Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 12-22 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-16 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Bowen.

The valve body is readable on elements 44 and 80 and the carrier is readable on elements 58 and 78. Element 23 is readable on the filling pipe. The pivoted flap is readable on element 40. Element 125 is readable on the lever rod and elements 22, 24, 26, 28, 30, 32 and 34 are readable on the linkage. The float is disposed on the carrier via the linkage elements 22, 24, 26, 28, 30, 32 and 34. The lever rod extends through the carrier (see figures 8-10). The transverse wall seat for the flap is readable on elements 102 and 106. The claimed bearing web is readable on the opening that the bearings are received within the transverse wall of the carrier.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowen in view of Bowen in view of either one of Blue et al, Lagache or McGillis (3,963,041). The above claims are readable on the patent to Bowen with the single exception of having a flow diverter disposed between the connection fitting of the fill pipe and the valve housing to prevent a direct impact of the kinetic force of the flow on the valve flap, when it is in an open position. The patent to either one of Blue et al, Lagache or McGillis teaches the above exception. In view of the teaching of either one of Blue et al, Lagache or McGillis, it would be obvious to one of ordinary skill in the art, at the time the invention was made, to provide the above exception to the device of Bowen as taught by element 86 of Blue et al, element 34 of Lagache or element 78 of McGillis.

Allowable Subject Matter

Claims 17 and 21-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's
